## final test 01

## **Congratulations!**

You completed this test on 04/04/2025 at 17:39

Which of these is an example of ordinal data?
○ Blood type (A, B, AB, O)
○ Grades in school (A, B, C)
○ Number of pets owned
○ Temperature in Celsius

How do you reshape a NumPy array arr to have 3 rows and 4 columns?

arr.resize(3,4)

arr.reshape(3,4)

arr.reshape((3,4))

arr.shape(3,4)

| II II | How do you create an array with values ranging from 1 to 10 in NumPy?  |          |
|-------|--|----------|
|       | np.range(1,10)   |          |
|       | pp.arange(1,11)  |          |
|       | np.linspace(1,10)  |          |
|       | np.list(1,10)  |          |
|       |  |          |
| 11    | The normal distribution is:  |          |
|       | Skewed left  |          |
|       | Bell-shaped and symmetric  |          |
|       | Uniformly distributed  |          |
|       | Bimodal  |          |
|       |  |          |
|       |  |          |
| <br>  | Which distribution shape can a histogram help identify?  |          |
| 10    | Which distribution shape can a histogram help identify?  Normal  | <b>⊘</b> |
| 1     |  |          |
| 10    | Normal   |          |
| 40    | Normal Skewed  |          |
| 1     | <ul><li>Normal</li><li>Skewed</li><li>Bimodal</li></ul>  |          |
|       | <ul><li>Normal</li><li>Skewed</li><li>Bimodal</li></ul>  |          |
|       | <ul><li>Normal</li><li>Skewed</li><li>Bimodal</li><li>✓ All of the above</li></ul>   |          |
|       | <ul> <li>Normal</li> <li>Skewed</li> <li>Bimodal</li> <li>✓ All of the above</li> </ul> A dataset with multiple modes is called:   |          |
|       | <ul> <li>Normal</li> <li>Skewed</li> <li>Bimodal</li> <li>All of the above</li> </ul> A dataset with multiple modes is called: <ul> <li>Unimodal</li> </ul>                  |          |
|       | <ul> <li>Normal</li> <li>Skewed</li> <li>Bimodal</li> <li>All of the above</li> </ul> A dataset with multiple modes is called: <ul> <li>Unimodal</li> <li>Bimodal</li> </ul> |          |

| II | The mode represents:   |
|----|--|
|    | The average value of a dataset   |
|    | The value that occurs most frequently  |
|    | The middle value of the dataset  |
|    | The spread of data   |
|    |  |
| 10 | In a normal distribution, the mean, median, and mode are:  |
|    | Different  |
|    | ✓ Equal  |
|    | Random   |
|    | Always zero  |
|    |  |
|    |  |
| II | How can you assign a default value to a function argument in R?  |
| 11 | How can you assign a default value to a function argument in R?  By assigning it in the function body  |
| 11 |  |
| 40 | By assigning it in the function body   |
| 4  | By assigning it in the function body      Using the default() function   |
|    | <ul> <li>By assigning it in the function body</li> <li>Using the default() function</li> <li>Assigning a value in the argument list</li> </ul>   |
|    | <ul> <li>By assigning it in the function body</li> <li>Using the default() function</li> <li>Assigning a value in the argument list</li> </ul>   |
|    | <ul> <li>By assigning it in the function body</li> <li>Using the default() function</li> <li>Assigning a value in the argument list</li> <li>Using the set() function</li> </ul>   |
|    | <ul> <li>□ By assigning it in the function body</li> <li>□ Using the default() function</li> <li>☑ Assigning a value in the argument list</li> <li>□ Using the set() function</li> </ul> In ggplot2, which function is used for a histogram?   |
|    | <ul> <li>By assigning it in the function body</li> <li>Using the default() function</li> <li>✓ Assigning a value in the argument list</li> <li>Using the set() function</li> <li>In ggplot2, which function is used for a histogram?</li> <li>✓ geom_histogram()</li> </ul>                            |
|    | <ul> <li>By assigning it in the function body</li> <li>Using the default() function</li> <li>Assigning a value in the argument list</li> <li>Using the set() function</li> <li>In ggplot2, which function is used for a histogram?</li> <li>✓</li> <li>geom_histogram()</li> <li>geom_col()</li> </ul> |

| 1   | What is the output of if (FALSE) print("Hello")?               |
|-----|--|
|     | Hello  |
|     | FALSE  |
|     | NULL   |
|     | ✓ No output  |
|     |  |
| II  | In ggplot2, which geom function is used to create a line plot? |
|     | geom_bar()   |
|     | geom_line()  |
|     | geom_histogram()   |
|     | geom_col()   |
|     |  |
| 10  | A null hypothesis is:  |
|     | A statement of no effect or no difference                      |
|     | Always true  |
|     | A claim of significant effect                                  |
|     | Randomly chosen  |
|     |  |
|     |  |
|     |  |
| 1   | How do you create an infinite loop in R?                       |
| 110 | How do you create an infinite loop in R?  while(TRUE) { }      |
| 10  |  |
| 11  | while(TRUE) { }  |
| 10  | <pre>while(TRUE) { }   for (i in 1:lnf) { }</pre>              |

| II II | In base R, which argument in heatmap() controls clustering?   |          |
|-------|---|----------|
|       | scale   |          |
|       | clustering  |          |
|       | hclustfun   |          |
|       | ○ col   |          |
|       |   |          |
| 10    | What does np.array([1, 2, 3]) return?   |          |
|       | ○ A list  |          |
|       | ✓ A NumPy array   |          |
|       | A tuple   |          |
|       | A dictionary  |          |
|       |   |          |
|       |   |          |
| 10    | Which type of plot is most useful for detecting outliers?   |          |
| "     | Which type of plot is most useful for detecting outliers?  Box plot   | <b>⊘</b> |
| "     |   |          |
| 110   |   |          |
| 110   | Box plot Line plot  |          |
| 110   | Box plot Line plot Histogram  |          |
|       | Box plot Line plot Histogram  |          |
|       | Box plot Line plot Histogram Scatter plot   |          |
|       | <ul> <li>Box plot</li> <li>Line plot</li> <li>Histogram</li> <li>Scatter plot</li> </ul> Type I error occurs when:  |          |
|       | <ul> <li>✓ Box plot</li> <li>✓ Line plot</li> <li>→ Histogram</li> <li>✓ Scatter plot</li> </ul> Type I error occurs when: <ul> <li>✓ Rejecting a true null hypothesis</li> </ul>   |          |
|       | <ul> <li>☑ Box plot</li> <li>☐ Line plot</li> <li>☐ Histogram</li> <li>☐ Scatter plot</li> </ul> Type I error occurs when: <ul> <li>☑ Rejecting a true null hypothesis</li> <li>☐ Accepting a true null hypothesis</li> </ul> |          |

| П | In ggplot2, how do you convert a bar chart into a pie chart?  |
|---|---|
|   | Add coord_polar(theta = "y")  |
|   | Use geom_pie()  |
|   | Apply facet_wrap()  |
|   | Change geom_col() to geom_point()   |
|   | What visualization is best for checking if a dataset follows a normal                               |
|   | distribution?   |
|   | Histogram   |
|   | Scatter plot  |
|   | Bar chart   |
|   | O Pie chart   |
|   |   |
|   | Scenario: Employee Age Study  A survey is conducted to study the age distribution of employees in a |
|   | company. The ages are measured in whole years (e.g., 25, 30, 35).                                   |
|   | Question: What type of data is represented by the ages of employees?                                |
|   | Continuous  |
|   | Nominal   |
|   | Discrete  |
|   | Ordinal   |
|   |   |

| 10 | Which chart should be used to analyze the relationship between three numerical variables? |
|----|---|
|    | Scatter plot with color mapping   |
|    | O Pie chart   |
|    | Histogram   |
|    | O Box plot  |
|    |   |
| 1  | If you want to visualize the proportion of missing values in a dataset,                   |
|    | which type of plot is most useful?  |
|    | O Bar chart   |
|    | ✓ Heatmap   |
|    | Histogram   |
|    | Contract Line plot  |
|    |   |
| I  | Data such as "Yes" or "No" is:  |
|    | Oiscrete data   |
|    | Continuous data   |
|    | Nominal data  |
|    | Ordinal data  |
|    |   |

| 10 | Which Seaborn function is best for visualizing categorical data?                  |
|----|---|
|    | sns.barplot()   |
|    | sns.countplot()   |
|    | sns.scatterplot()   |
|    | Both a) and b)  |
|    |   |
|    | How do you generate a random number between 0 and 1 in NumPy?                     |
|    | np.random.rand()  |
|    | np.random.random()  |
|    | np.random.randint(0,1)  |
|    | Both a) and b)  |
| 10 | M/bish visualization is best for showing the distribution of a numerical          |
|    | Which visualization is best for showing the distribution of a numerical variable? |
|    | ✓ Histogram   |
|    | Bar Chart   |
|    | C Line Plot   |
|    | Scatter Plot  |
|    |   |

| 11 | What is the best visualization for correlation between multiple numerical variables?  Heatmap Pie Chart Line Plot           |          |
|----|---|----------|
|    | Histogram   |          |
| "  | How do you add a legend to a Matplotlib plot?   | <b>⊘</b> |
|    | plt.legend()  |          |
|    | plt.add_legend()  |          |
|    | plt.show_legend()   |          |
|    | plt.make_legend()   |          |
|    | Which function is used to create violin plots in Seaborn?  sns.violinplot() sns.boxplot() sns.stripplot() sns.scatterplot() | •        |
| 10 | Which method is used to drop rows with missing values?  ✓ df.dropna()  ✓ df.fillna()  ✓ df.remove_na()                      |          |

| II | What does sns.pairplot(df) do?  |
|----|---|
|    | Creates scatter plots for all pairwise relationships  |
|    | Plots a single histogram  |
|    | Shows a bar chart of categorical values   |
|    | Oraws a heatmap   |
|    |   |
| 1  | How do you change the color palette in Seaborn?   |
|    | sns.set_palette("pastel")   |
|    | sns.set_theme("colorful")   |
|    | sns.color_map("red")  |
|    | sns.set_color("blue")   |
|    |   |
|    |   |
| 10 | What is the best plot for time-series data?   |
| 1  | What is the best plot for time-series data?  Line Chart   |
| 11 |   |
| 11 | ✓ Line Chart  |
| 11 | Line Chart  Bar Chart   |
| "  | Line Chart  Bar Chart  Pie Chart  |
|    | Line Chart  Bar Chart  Pie Chart  |
|    | Line Chart  Bar Chart  Pie Chart  Scatter Plot  |
|    | <ul> <li>✓ Line Chart</li> <li>─ Bar Chart</li> <li>─ Pie Chart</li> <li>─ Scatter Plot</li> </ul> How do you generate a random integer between 10 and 100?   |
|    | <ul> <li>▶ Line Chart</li> <li>│ Bar Chart</li> <li>│ Pie Chart</li> <li>│ Scatter Plot</li> </ul> How do you generate a random integer between 10 and 100? <ul> <li>✓ np.random.randint(10,100)</li> </ul>                                     |
|    | <ul> <li>▶ Line Chart</li> <li>▶ Bar Chart</li> <li>▶ Pie Chart</li> <li>▶ Scatter Plot</li> </ul> How do you generate a random integer between 10 and 100? <ul> <li>♠ np.random.randint(10,100)</li> <li>♠ np.random.random(10,100)</li> </ul> |

| 10 | What does plt.xlabel("X-axis") do?   |
|----|--|
|    | Adds a title   |
|    | Labels the X-axis  |
|    | Labels the Y-axis  |
|    | Adds a legend  |
|    |  |
| 1  | Which function creates a heatmap in Seaborn?   |
|    | sns.heatmap()  |
|    | sns.correlationplot()  |
|    | sns.matrixplot()   |
|    | sns.gridplot()   |
|    |  |
|    |  |
| 1  | What argument is used to change the line color in plt.plot()?  |
| 11 | What argument is used to change the line color in plt.plot()?  |
| 11 |  |
| 11 | color  |
| 1  | color fill   |
|    | color fill linecolor   |
|    | color fill linecolor   |
|    | color fill linecolor shade   |
|    | <ul> <li>color</li> <li>fill</li> <li>linecolor</li> <li>shade</li> </ul> Which Seaborn function is used to create a histogram? ✓  |
|    | <ul> <li>Color         <ul> <li>fill</li> <li>linecolor</li> <li>shade</li> </ul> </li> <li>Which Seaborn function is used to create a histogram?</li> <li>✓ sns.histplot()</li> </ul> |
|    | <ul> <li>color fill linecolor shade</li> <li>Which Seaborn function is used to create a histogram?</li> <li>✓ sns.histplot() sns.distplot()</li> </ul>                                 |

| 1  | What does arr[1:4] return in NumPy?                               |
|----|---|
|    | Elements from index 1 to 4  |
|    | Elements from index 1 to 3  |
|    | Elements from index 0 to 3  |
|    | Elements from index 2 to 4  |
|    |   |
|    | How do you reset the index of a Pandas DataFrame?                 |
|    | <pre>df.index_reset()</pre>                                       |
|    | df.reindex()  |
|    | <pre>df.reset_index()</pre>                                       |
|    | df.drop_index()   |
|    |   |
| 10 | How do you load built-in datasets in Seaborn?                     |
|    | sns.datasets.load_dataset()                                       |
|    | sns.load_dataset()  |
|    | sns.get_data()  |
|    | sns.read_data()   |
|    |   |
| 1  | Which argument in geom_density() controls the transparency of the |
|    | curve?  |
|    | ✓ alpha   |
|    | color   |
|    | size  |
|    | linetype  |
|    |   |

| I   | In base R, what function is used to create multiple box plots in one plot?  |          |
|-----|---|----------|
|     | boxplot(var1, var2,)  |          |
|     | plot.boxplot()  |          |
|     | multi.boxplot()   |          |
|     | box(var1, var2,)  |          |
|     | What does the diagonal in a pair plot represent?  | <b>⊘</b> |
|     | O Box plots   |          |
|     | Histograms of each variable   |          |
|     | Correlation values  |          |
|     | Scatter plots   |          |
|     |   |          |
|     |   |          |
| 1   | Which chart is best suited for showing time-series data?  |          |
| 10  | Which chart is best suited for showing time-series data?  Heatmap   |          |
| 110 |   |          |
| 110 | Heatmap   |          |
|     | <ul><li>→ Heatmap</li><li>✓ Line chart</li></ul>  |          |
|     | <ul><li>Heatmap</li><li>✓ Line chart</li><li>Scatter plot</li><li>Bar chart</li></ul>   |          |
|     | <ul><li>Heatmap</li><li>✓ Line chart</li><li>Scatter plot</li></ul>   |          |
|     | <ul><li>Heatmap</li><li>✓ Line chart</li><li>Scatter plot</li><li>Bar chart</li></ul>   |          |
|     | <ul> <li>Heatmap</li> <li>Line chart</li> <li>Scatter plot</li> <li>Bar chart</li> </ul> How do you select a single column from a Pandas DataFrame?   |          |
|     | <ul> <li>Heatmap</li> <li>✓ Line chart</li> <li>Scatter plot</li> <li>Bar chart</li> </ul> How do you select a single column from a Pandas DataFrame? <ul> <li>df.column_name</li> </ul>                            |          |
|     | <ul> <li>Heatmap</li> <li>∠ Line chart</li> <li>Scatter plot</li> <li>Bar chart</li> </ul> How do you select a single column from a Pandas DataFrame? <ul> <li>df.column_name</li> <li>df['column_name']</li> </ul> |          |

| 10   | Which method displays the first 5 rows of a DataFrame?   |  |
|------|--|--|
|      | df.head()  |  |
|      | df.first()   |  |
|      | df.display()   |  |
|      | df.show()  |  |
|      |  |  |
| 10   | Which parameter controls point size in geom_point()?     |  |
|      | ✓ size   |  |
|      | pointsize  |  |
|      | width  |  |
|      | alpha  |  |
|      |  |  |
| 10   | Which chart is best suited for showing trends over time? |  |
|      | Histogram  |  |
|      | ✓ Line plot  |  |
|      | O Pie chart  |  |
|      | O Box plot   |  |
|      |  |  |
| II 🗆 | Which function is used to create a pie chart in base R?  |  |
|      | barplot()  |  |
|      | pie()  |  |
|      | hist()   |  |
|      | plot()   |  |
|      | O plotty   |  |

| 1 | What function is used to create a bar chart in base R? |  |
|---|--|--|
|   | barplot()  |  |
|   | hist()   |  |
|   | O plot()   |  |
|   | opie()   |  |
|   |  |  |
| 1 | What will the following code output?                   |  |
|   | greet <- function(name = "Guest") {                    |  |
|   | paste("Hello,", name) }                                |  |
|   | greet()  |  |
|   | 5. 2.3. <b>(</b> )                                     |  |
|   | Error  |  |
|   | ✓ Hello, Guest   |  |
|   | Null   |  |
|   | Guest  |  |
|   |  |  |
| 1 | What is the output of the following code?              |  |
|   | add <- function(x, y) { x + y }                        |  |
|   | add(3, 5)  |  |
|   |  |  |
|   |  |  |

|    | <ul> <li>Skips to the next iteration</li> <li>✓ Exits the loop</li> <li>Stops the R session</li> <li>Restarts the loop</li> </ul> What does the %in% operator do in R? Performs element-wise addition  |          |
|    | <ul> <li>Skips to the next iteration</li> <li>✓ Exits the loop</li> <li>Stops the R session</li> <li>Restarts the loop</li> <li>What does the %in% operator do in R?</li> <li>Performs element-wise addition</li> <li>✓ Checks for membership</li> </ul> |          |

| 10  | Which function converts a numeric vector into a character vector?   |          |
|-----|---|----------|
|     | as.numeric()  |          |
|     | ✓ as.character()  |          |
|     | as.logical()  |          |
|     | as.vector()   |          |
|     |   |          |
|     | Which method creates an array of zeros in NumPy?  |          |
|     | op.zeros()  |          |
|     | np.ones()   |          |
|     | np.empty()  |          |
|     | np.full()   |          |
|     |   |          |
|     |   |          |
| 10  | What is the correct syntax for a for loop in R?   |          |
| 110 | What is the correct syntax for a for loop in R?  for (i in 1:5) { print(i) }  | <b>⊘</b> |
| 11  |   |          |
| 110 | of for (i in 1:5) { print(i) }  |          |
| 10  | <pre>for (i in 1:5) { print(i) }   for i in range(1:5):</pre>   |          |
| 10  | <pre>for (i in 1:5) { print(i) } for i in range(1:5): for i from 1 to 5:</pre>  |          |
|     | <pre>for (i in 1:5) { print(i) } for i in range(1:5): for i from 1 to 5:</pre>  |          |
|     | <pre>for (i in 1:5) { print(i) }     for i in range(1:5):     for i from 1 to 5:       loop (i in 1:5) { print(i) }</pre>   |          |
|     | <pre>for (i in 1:5) { print(i) }     for i in range(1:5):     for i from 1 to 5:         loop (i in 1:5) { print(i) }  Which measure is most affected by outliers?</pre>                                |          |
|     | <pre>     for (i in 1:5) { print(i) }     for i in range(1:5):         for i from 1 to 5:         loop (i in 1:5) { print(i) }  Which measure is most affected by outliers?  Mean </pre>                |          |
|     | <pre>     for (i in 1:5) { print(i) }     for i in range(1:5):         for i from 1 to 5:         loop (i in 1:5) { print(i) }  Which measure is most affected by outliers?  Mean         Median </pre> |          |

| 10 | Which function creates a box plot in base R?            |  |
|----|---|--|
|    | hist()  |  |
|    | <pre>boxplot()</pre>                                    |  |
|    | barplot()   |  |
|    | density()   |  |
|    |   |  |
| 10 | Which is not a measure of central tendency?             |  |
|    | ○ Mean  |  |
|    | Median  |  |
|    | ○ Mode  |  |
|    | Standard deviation                                      |  |
|    |   |  |
| 1  | The alternative hypothesis represents:                  |  |
|    | The status quo  |  |
|    | ✓ The presence of an effect or difference               |  |
|    | No relationship in data                                 |  |
|    | A sample statistic                                      |  |
|    |   |  |
| 11 | Simple random sampling ensures:                         |  |
|    | Equal chance for every population member to be selected |  |
|    | Selection based on convenience                          |  |
|    | Grouping data into clusters                             |  |
|    | Proportional selection of subgroups                     |  |
|    |   |  |

| ı    | Which of the following is an example of a random variable?   |
|------|--|
|      | Number of heads in 10 coin tosses  |
|      | A fixed value like 3.14  |
|      | A qualitative description like "red"   |
|      | None of the above  |
|      |  |
| II   | In a normal distribution, about 99.7% of data falls within how many  |
|      | standard deviations?   |
|      | <u> </u>   |
|      | <u>2</u>   |
|      | <b>⊘</b> 3   |
|      |  |
|      |  |
|      |  |
| ıI 🗆 | What is the total area under a normal distribution curve?  |
| 11   | What is the total area under a normal distribution curve?  0.5   |
| 110  |  |
| 11   | 0.5  |
| 11   | <ul><li>○ 0.5</li><li>② 1</li></ul>  |
| 11   | <ul><li>○ 0.5</li><li>② 1</li><li>○ 2</li></ul>  |
|      | <ul> <li>○ 0.5</li> <li>② 1</li> <li>○ 2</li> <li>○ 10</li> </ul>  |
|      | <ul><li>○ 0.5</li><li>② 1</li><li>○ 2</li></ul>  |
|      | <ul> <li>○ 0.5</li> <li>② 1</li> <li>○ 2</li> <li>○ 10</li> </ul>  |
|      | <ul> <li>○ 0.5</li> <li>② 1</li> <li>○ 2</li> <li>○ 10</li> </ul> The standard normal distribution has a mean of: ✓  |
|      | <ul> <li>○ 0.5</li> <li>② 1</li> <li>○ 2</li> <li>○ 10</li> </ul> The standard normal distribution has a mean of: <ul> <li>○ 1</li> <li>○ 0</li> <li>○ -1</li> </ul> |
|      | <ul> <li>○ 0.5</li> <li>② 1</li> <li>○ 2</li> <li>○ 10</li> </ul> The standard normal distribution has a mean of: <ul> <li>○ 1</li> <li>○ 0</li> </ul>               |

| 11  | Approximately what percentage of data falls within 1 standard deviation of the mean in a normal distribution?  50% 68% 95% 99%   |  |
|-----|--|--|
| 110 | Which measure of dispersion is most robust to outliers?  Standard deviation  Range  Variance  Interquartile range (IQR)  |  |
| 11  | Range is defined as:  The difference between the highest and lowest values  The average of the dataset  The most frequently occurring value  The middle value of the dataset |  |
|     | The classification of data into male and female is an example of:  Nominal data Ordinal data Interval data Continuous data   |  |

| II | Which measure of dispersion is most sensitive to outliers?         |
|----|--|
|    | Range  |
|    | Interquartile range  |
|    | Standard deviation   |
|    | ○ Median   |
|    |  |
| П  | If the mean of 10 numbers is 15, the sum of the numbers is:        |
|    | ✓ 150  |
|    | <u> </u>   |
|    | <u> </u>   |
|    | <u> </u>   |
|    |  |
| 10 | What is IBM Watson Studio primarily used for?                      |
|    | Cloud storage  |
|    | Oata science and AI model development                              |
|    | Web hosting  |
|    | File management  |
|    |  |
| 10 | Which programming languages are supported in IBM Watson Studio for |
|    | data visualization?  |
|    | ✓ Python and R   |
|    | Java and C++   |
|    | HTML and CSS   |
|    | Swift and Kotlin   |
| 1  |  |

| 110 | Which tool in IBM Watson Studio is specifically used for interactive data visualization?  Watson Assistant  Data Refinery  Watson Discovery |
|-----|---|
|     | ○ AutoAl  |
| 10  | IBM Watson Studio uses which popular Python libraries for visualization?  |
|     | Matplotlib and Seaborn  |
|     | NumPy and Pandas  |
|     | TensorFlow and PyTorch  |
|     | SQL and MongoDB   |
| 11  | What is the primary advantage of using IBM Watson for data visualization?   |
|     | Only experts can use it   |
|     | No programming is required for basic visualizations   |
|     | It only works with structured data  |
|     | It does not support interactive charts  |
|     |   |

| ıl 🗆     | Which type of chart is best for showing trends over time in Watson Studio? |
|----------|--|
|          | × Bar Chart  |
|          | Line Chart   |
|          | O Pie Chart  |
|          | Scatter Plot   |
| <b>I</b> | When analyzing the distribution of a single numeric variable, which        |
|          | visualization should you use?  |
|          | Histogram  |
|          | Pie Chart  |
|          | O Box Plot   |
|          | Both a and c   |
|          | What type of visualization is most effective for comparing multiple        |
|          | categories in IBM Watson?  |
|          | Bar Chart  |
|          | Scatter Plot   |
|          | ○ Heatmap  |
|          | ○ Violin Plot  |
|          |  |

| 11 | Which type of visualization is best for showing relationships between two continuous variables?  Scatter Plot Pie Chart Bar Graph Treemap   |
|----|---|
| 11 | Heatmaps in IBM Watson Studio are commonly used for:  Showing relationships between categorical variables  Visualizing correlation between numerical variables  Creating pie charts  Displaying time-series data          |
| 1  | IBM Watson Studio can integrate data from which sources?  ○ Cloud databases ○ CSV and Excel files ○ APIs and IoT devices ○ All of the above   |
| 1  | What is an advantage of using Watson's AI-powered visualizations?  It predicts patterns in the data  It replaces human analysts completely  It does not require any data preparation  It only supports pre-defined charts |
